mathews hydrants

INCLUDE ALL THESE FEATURES!

Only Mathews Hydrants give you so many advantages in one simply constructed assembly. Unless your hydrants include *all* these plus features, they're not Mathews.

- 1 All working parts contained in quickly replaceable barrel.
- 2 So constructed that hydrant broken in traffic accident can be replaced without excavating.
- 3 Valve opens against water pressure to prevent leakage or flooding in case hydrant is broken in traffic accident.
- 4 Stuffing box plate cast integral with nozzle section . . . a simplification which eliminates extra parts and results in greater strength, more leak-proof construction.
- 5 Only one part requiring lubrication.
- 6 Head turns 360° without removal of bolts, and is replaceable.
- 7 Nozzle level easily raised or lowered without excavating.
- 8 Nozzle sections easily changed.
- 9 Free-moving case of "Sand-Spun" superior cast iron protects installation against ground heaves.
- 10 Hydrant drains dry after use. No danger of frozen hydrant stem.
- 11 Available with all pipe connections, including mechanical joint.
- 12 An old Mathews can be brought up to date by inserting a modern barrel.

MATHEWS HYDRANTS

Advertising space in the Directory is made available only to individuals and firms holding membership in AWWA.

AMERICAN WATER WORKS ASSOCIATION, INC.
521 Fifth Avenue New York 17, N.Y.

This Directory is not for sale. It is distributed to members of all grades for their use as members of the Association and is not to be placed in the hands of any nonmembers to be used as the basis of personal or mail promotion or solicitation.

Officers of the Association and its Sections or Divisions may obtain addressed labels from the membership list without charge if the application for such list is made in writing by the person requesting it and the use to which the name list is to be put is clearly stated and shown to be in conformance with the conditions laid down in the paragraph above.

Any member of the Association may purchase a set of addressed labels or cards by depositing with the Secretary an amount designated by him to cover labor and material, and by recording the exact use to be made of the list. If the designated use to which the list is to be put is not in accord with the intent of the first paragraph herein, the Secretary will not make the list available to the applicant.

This 1952 edition of the AWWA Directory contains the membership lists, corrected through October 1, 1952, and a brief directory of committees. In accordance with the new policy of annual publication, another Directory will be published in 1953, and will contain a list of changes in membership status for the intervening year, as well as such editorial material as a water works buyers' guide, procedural and historical information about AWWA, and other features. The next full membership list will appear in the succeeding Directory, in 1954, and the two Directory sections will appear in alternate years thereafter—the membership lists in even-numbered years; the other editorial matter in the odd years.

SUMMARY OF MEMBERSHIP

October 1, 1952

Honorary Members	37
Life Members	232
Active Members	7,510
Corporate Members	869
Associate Members	350
Junior Members	47
Affiliates	50
Municipal Service Subscribers	152
Total	9,247

The Consolidated List of Members, which begins on page 1 following, includes the members of all grades—Honorary, Active, Corporate, Associate and Junior—and also the Affiliates and Municipal Service Subscribers. The listing is correct as of October 1, 1952, including all those whose applications were received up to that date.

For separate listings of :

Municipal Service Subscribers, see page 147.

Corporate Members, see page 148.

Associate Members, see page 153.

All members are listed geographically beginning on page 1. The correspondence between this list and the section breakdown on the next two pages may not be exact, because many members do not live in the localities in which they work, and may therefore be listed in this Directory at one address while their section membership is in a different state.

MEMBERSHIP BY SECTIONS

As of October 1, 1952

Total membership figures for each section are listed after the section name in bold-face type. Regional breakdowns within sections are in italic type and follow the section summary. The totals reflect the membership status set forth in this Directory.

**WABASH DOUBLE-LID
COVERS**

for **MAXIMUM
PROTECTION** from frost

**WRITE FOR
CATALOG**

The new No. 50 Ford Catalog contains full information. **FREE.** Send today.

The Wabash Cover was designed to provide the utmost in frost protection for pit water meters. Two lids, with a 4" dead air space between, add extra insulation. Notice also, the extra depth and the sloping skirt that help hold heat loss to a minimum.

Top lid is inset and locked with the patented Ford Lifter Worm Lock. There is no finer meter setting protection.

FOR BETTER WATER SERVICES

Manufactured by **THE FORD METER BOX COMPANY, INC.**

Wabash, Indiana

Philadelphia's Independence Hall, where the Liberty Bell is housed, as it looked 100 years ago

Philadelphia has cast iron water and gas mains in service that were laid well over a century ago. One of them is America's oldest cast iron water main, still functioning despite the radically changed conditions of street traffic and underground utility services in 100 years. The fact that cast iron pipe, laid generations ago, withstands the shock of heavy-duty traffic and the stresses caused by congested underground structures, amply demonstrates its shock-strength and beam-strength. Because of these strength factors and effective resistance to corrosion, cast iron water and gas mains, laid over 100 years ago, are still serving in the streets of more than 30 cities in the United States and Canada. United States Pipe and Foundry Co., General Offices, Burlington, N. J. Plants and Sales Offices Throughout the U. S. A.

NUMBER EIGHT OF A SERIES

INTRODUCTION

THE American Water Works Association was organized in 1881 to "advance the knowledge of the design, construction, operation and management of water works." Its activities in part are developed through regional or state Sections, in part through general Divisions, in part through technical committees and in part through its monthly JOURNAL.

There are at present 30 regional or state Sections. The largest ones are in California, New York, and the Southwest. Each Section has at least one meeting each year with attendance totals ranging from 100 to more than 1,000 persons interested in the field. Papers are presented; round table discussions are held; tests are made; exhibits frequently are available—all designed to improve water works design and management in the Section area.

There are four professional Divisions of the Association: Management, Water Resources, Water Purification, and Transmission and Distribution. The programs at the Annual Conferences of the Association are built around the activities of these Divisions.

The technical work of the Association is organized under the Committee on Water Works Practice and the Committee on Water Works Administration. These are groups of men selected to provide a cross section of the Association's field of interest, in the persons of leaders in the field. No technical pronouncements in the name of the Association are made until they are accepted by these committees and approved by the Board of Directors.

The Board of Directors has also established certain special committees to deal in fields of Association policy. At present such committees include "General Policy," "National Water Policy," and a committee on "Federal Activities" which devotes itself to problems derived from federal orders and rulings.

The JOURNAL AWWA is a monthly publication which totals approximately 2,500 pages per year. In it are found the papers and reports on water works subjects deemed to have permanent or major value to the field. About 150 pages annually are given over to abstracts of articles the world over which relate to all aspects of water works affairs. No comparable cross-section of data exists elsewhere. An Index of Association publications for the years 1881 to 1939 and an Index to the JOURNAL for the years 1940-1944 are available.

The Association maintains headquarters at 521 Fifth Avenue, New York 17, N.Y., with a full-time staff of eleven persons available for conference or correspondence on matters of general water works interest.

HORTON STEEL TANKS for Municipal Service

This 1,000,000-gal. ornamental standpipe is an example of the modern, streamline structures we are building for municipalities to provide gravity water pressure for general service and fire protection.

We also build ellipsoidal bottom elevated tanks in sizes from 15,000 to 500,000 gals., radial-cone elevated tanks with capacities from 500,000 to 3,000,000 gals., Hortonspheroidal elevated tanks having capacities of 1,000,000 to 3,000,000 gals., Waterspheres in standard sizes from 25,000 to 250,000 gals. and steel reservoirs.

Write our nearest office for complete information or estimating figures on steel tanks for municipal service.

OMEGA VOLUMETRIC FLUORIDIZER

FEATURES

LARGE HOPPER CAPACITY

Holds two 100 lb. bags of Sodium Fluoride or Sodium Silicofluoride.

LOW FILLING HEIGHT

Bag of chemical is lifted less than 36 in. when loading hopper.

DUSTLESS LOADING

Entire bag of chemical is enclosed within hopper until empty.

Model 51-F

Belt Gravimetric Feeders • Loss-in-Weight Gravimetric Feeders • Universal Feeders • Rotolock Feeders
Lime Slakers • Laboratory Stirrers
Precision Solution Feeders • Disc Feeders • Rotodip Solution Feeders
Dust Collectors • Chemical Elevators

For complete information and new Bulletin 50-H14, address Omega Machine Co. (Division of Builders Iron Foundry), 365 Harris Ave., Providence 1, Rhode Island.

OMEGA
The Last Word in Feeders

**any meter
worth repairing
is worth
repairing
well...**

It takes a little longer and costs a little more to make a repaired meter register 90% or better at 1/4 gpm. But it is time and money well spent — it will be quickly returned in added revenue.

The fact is, about 13% of domestic water use is at less than $\frac{1}{2}$ gpm. — or an average of about $\frac{1}{4}$ gpm. Perhaps your shop doesn't test at that rate. Maybe you feel it takes too much time — ties a man up too long—and you can't afford it.

But you can—and you should—afford it. You lose too much when you don't. Many water utilities have proved this for themselves—the savings come not only in increased revenues but in decreased pumping costs—neglected leaks are repaired.

**The time to insure best test results for water meters
is when you select them. Buy Tridents and you buy
sustained accuracy, ease of repair, maximum revenue.**

It takes all three

to get the best pipe protection

1

The right planning

It pays to have the benefit of experienced technical advice in planning pipe protection. A Barrett technical advisor is available to give you a hand *right from the start*. Through him, you take advantage of Barrett's long years of experience in protecting America's greatest pipelines.

2

The right enamels

Barrett^{*} Waterworks Enamel gives you all these advantages:

Rigid quality control • Prevents tuberculation and incrustation of interior pipe surfaces • Effectively protects external pipe surfaces against corrosion • High dielectric properties • Impermeable to moisture, non-absorptive, non-porous • High ductility and flexibility, shows high resistance to soil stresses • Unusual tenacity • Effective under all kinds of climatic conditions and topography • Service • Availability.

3

The right application

A Barrett Technical Service Representative is available for on-the-job consultation. He'll help you save time and money. Remember: even the finest enamels must be properly applied for proper protection.

and you get all three from **BARRETT**

*Write, wire or telephone for further information
about BARRETT pipe-protective products and services.*

**ON CALL
TO SERVE YOU**

**WALLACE & TIERNAN
FLUORIDATORS**

Wallace & Tiernan is on call to give you the same complete service on fluoridators that it has given on other chemical feed equipment for the past thirty-nine years.

When your community is considering the addition of fluorides, W&T Representatives are prepared to provide you with data on the types of chemicals which may be used, the selection of the point of application, the types of equipment available for feeding fluorides, and other aspects of fluoridation. After the decision to fluoridate has been made, W&T can provide accurate, dependable Fluoridators—especially designed for the exacting requirements of fluoridation. W&T's nationwide, factory trained, service staff is prepared to give prompt service on all W&T Fluoridators to ensure the continuous operation of the fluoridation process. W&T is On Call to serve you—see your W&T Representative for additional information.

CHLORINE AND CHEMICAL CONTROL EQUIPMENT
NEWARK 1, NEW JERSEY • REPRESENTED IN PRINCIPAL CITIES

The list beginning on the facing page includes AWWA members of all grades—Honorary, Life, Active, Corporate, Associate and Junior—and also the Affiliates and the Municipal Service Subscribers. For separate listings of the Municipal Service Subscribers, see page 147; Corporate Members, page 148; and Associate Members, page 153. A geographic breakdown of the membership is given beginning on page 157.

The date when the member first joined the Association is cited in each listing. Active and Life Members are designated only by the date; for example: (July '39). Corporate, Associate, and Junior Members are shown in the following manner: (Corp. M. July '39), (Assoc. M. July '39), (Jr. M. July '39). Affiliates and Municipal Service Subscribers are shown by: (Affil. July '39) and (Munic. Sv. Sub. July '39).

Offices held by members are cited according to the years of the conventions during which the members served. Thus, for example, a member taking office the last day of the 1948 convention and serving until the last day of the 1949 conference will be listed as "*Vice-Pres. '49.*" Awards and Honorary Memberships are shown by the year of the convention at which they were presented. Members enrolled in one or more of the Association's four Divisions—Water Works Management Division, Water Resources Division, Water Purification Division, and Transmission & Distribution Division—are designated by *M*, *R*, *P*, and *D*, respectively.

CONSOLIDATED LIST OF MEMBERS

Members registered in the Water Works Management Division are indicated by "M"; in the Water Resources Division by "R"; in the Water Purification Division by "P"; and in the Transmission and Distribution Division by "D."

A4.C—Joint Administration of Water and Sewer Facilities (WMD)	184
A4.D—Water Use	184
A4.D1—Industrial Water Use (WRD)	184
A4.D2—Domestic Water Use (WMD)	184
III. Water Works Practice Committees and Task Groups	184
Committee on Water Works Practice	
E2—Water Resources (WRD) ...	184
E2.1—Committees (WRD)	184
E2.A—Weather Control (WRD)	
E2.B—Production of Usable Water From Salt Water	185
E3—Watersheds	185
E3.A—Watershed Protection and Erosion Control (WRD)	185
E3.B—Public Use of Watershed Areas (WRD)	185
E4—Ground Water (WRD)	185
E4.A—Deep Wells (WRD)	185
E4.B—Artificial Ground Water Recharge (WRD)	185
E4.C—Underground Waste Disposal and Control (WRD) ...	185
E5—Water Purification (WPD) ..	185

E5.A—Water Purification Development (WPD)	185	E7.F1—Valves	187
E5.B—Manual of Water Quality and Treatment (WPD) ...	185	E7.F2—Sluice Gates	187
E5.B1—Revision, Chapter on Aeration (WPI)	185	E7.F3—Fire Hydrants	187
E5.B2—Revision, Chapter on Mixing and Sedimentation (WPD)	185	E7.M—Meters	187
E5.B3—Revision, Chapter on Filtration (WPD)	185	E7.S—Service Line Materials	187
E5.1—Specifications and Tests for Water Purification Chemicals (WPD)	185	IV. Joint Committees With Other Organizations	187
E5.2—Biological and Chemical Problems of Water Distribution Systems (WPD)	185	<i>AWWA Activities Under Jurisdiction of Board of Directors</i>	187
E5.3—Specifications for and Methods of Testing Cation Exchangers (WPD)	185	Water and Sewage Works Development	187
E5.4—Practical Loading Capacities of Water Treatment Plants (WPD)	185	Federal Activities	187
E5.5—Water Conditioning and Prevention of Corrosion and In-crustation	185	<i>AWWA Activities Under Jurisdiction of Committee on Water Works Administration</i>	188
E5.6—Specifications for Filtering Materials (WPD)	185	Water Works Accounting Manual.	
E5.7—Open-Air Reservoirs (WPD)	186	Survival and Retirement Experience With Water Works Facilities	188
E5.8—Disposal of Wastes From Water Purifications and Softening Plants (WPD)	186	National Committee for Utilities Radio	188
E5.9—Standard Methods for the Examination of Water and Sewage (WPD)	186	<i>AWWA Activities Under Jurisdiction of Committee on Water Works Practice</i>	188
E5.10—Fluoridation Materials and Methods (WPD)	186	Joint Editorial Committee on Standard Methods for the Examination of Water and Sewage	188
E5.12—Instrumentation and Methods of Testing Radioactive Contamination in Water (WPD) .	186	Joint Research Committee on Boiler Feedwater Studies	188
E6—Power and Pumping	186	Joint Committee on Specifications for Field Welding of Steel Water Pipe Joints	188
E6.A—Water Hammer	186	Steel Standpipes and Elevated Tanks	189
E7—Transmission and Distribution		Water, Sewage, and Industrial Wastes Joint Committee on Critical Materials	189
E7.1—Study of Breaks in Water Distribution Systems	186	National Committee on Chlorine Suppliers	189
E7.A—Steel Pipe	186	V. AWWA Representatives on Committees of Other Organizations ..	189
E7.B—Reinforced Concrete Pipe ..	186	<i>Committees Under the Procedure of the American Standards Assn. ..</i>	189
E7.D—Laying Cast-Iron Pipe ...	187	A13—Scheme for the Identification of Piping Systems	189
E7.D1—Mechanical Standards ..	187	A21—Cast-Iron Pipe and Special Castings	189
E7.D1A—Investigation of Sul-fur Jointing Compounds ..	187	A35—Manhole Frames and Covers ..	189
E7.D2—Disinfection Procedure ..	187	B2.1—Pipe Threads	190
E7.E—Asbestos-Cement Pipe ..	187	B16—Pipe Flanges and Fittings ..	190
E7.F—Committees on Valves, Sluice Gates and Hydrants ..	187	B31—Code for Pressure Piping ..	190
		B33—Standardization of Screw Threads for Hose Couplings Other Than for Fire Hose Couplings ..	190
		B58—Deep Well Vertical Pumps ..	190
		C1—National Electrical Code ..	190

K61—Storage and Handling of Anhydrous Ammonia and Ammonia Solutions	190	President's Conference on Industrial Safety	191
Y1—Standardization of Abbreviations	190	Technical Advisory Board for Research on Decontamination of Radioactive Waters	191
Y10—Letter Symbols	191	Task Group to Develop Manual on Security Principles for the Water Works Industry	191
Y32—Graphical Symbols and Designations	191	Relief Valve Research Subcommittee, Technical Advisory Group for Domestic Gas Water Heating Research	
Z23—Sieves for Testing Purposes..	191	Public Health Advisory Committee .	191
Z48—Marking Compressed Gas Cylinders	191	Committee for the Advancement of Sanitary Engineering	191
Z59—Fluid Permeation	191		
NACE Inter-Society Corrosion Committee	191		

MEMBERSHIP OF COMMITTEES

As of August 1, 1952

The committees listed are those which have been appointed for the calendar year 1952 or for the Association year 1952-53. The President and Vice-President are *ex-officio* members of all Association committees, but are listed by name in committees to which they were appointed as individuals, before becoming officials of the Association. The initials WMD, WPD, WRD, or TD following the name of a committee indicate that it operates in the field of interest of the Water Works Management Division, the Water Purification Division, the Water Resources Division, or the Transmission and Distribution Division, respectively.

I. GENERAL COMMITTEES

EXECUTIVE COMMITTEE OF THE BOARD

C. H. CAPEN, *Chairman*
M. B. CUNNINGHAM

W. W. BRUSH
R. H. ELLIS

H. F. O'BRIEN

GENERAL POLICY COMMITTEE

Representatives of AWWA
A. E. BERRY, *Chairman*
A. P. BLACK
C. H. CAPEN

L. H. ENSLOW
W. V. WEIR

Representatives of WSWMA
H. F. O'BRIEN
W. J. ORCHARD

FINANCE COMMITTEE

W. J. ORCHARD, *Chairman*
C. J. ALFEE

REEVES NEWSOM

W. W. BRUSH, *Ex-Officio*
H. E. JORDAN, *Ex-Officio*

ADMINISTRATIVE COMMITTEE FOR EMPLOYEES' PENSION SYSTEM

REEVES NEWSOM, *Chairman*
C. J. ALFEE

W. W. BRUSH, *Treasurer*

E. F. JOHNSON, *Secretary*

PUBLICATION COMMITTEE

RICHARD HAZEN, *Chairman*

H. E. JORDAN, *Ex-Officio*

Review Committee

S. S. ANTHONY
C. A. BLACK
J. A. CAROLLO
R. L. DERBY
G. E. FERGUSON

WESTON GAVETT
L. R. HOWSON
W. R. LADE
V. C. LISCHER
E. E. NORMAN

H. A. PRICE
E. A. SCHMITT
L. N. THOMPSON
W. V. WEIR

Program Committee—1953 Convention

RICHARD HAZEN, *Chairman*
M. B. CUNNINGHAM, *Chr., WMD*
R. L. DERBY, *Chr., WPD*

D. L. MAFFITT, *Chr., WRD*
E. A. SCHMITT, *Chr., TD*

H. E. JORDAN, *Ex-Officio*
L. E. ATRES
R. L. McNAMEE

CONSTITUTION AND BY-LAWS COMMITTEE

R. L. DORRIN, *Chairman* W. W. BRUSH H. E. JORDAN, *Ex-Officio*

HONORARY MEMBERSHIP COMMITTEE

A. E. BERRY, *Chairman* W. V. WEIR A. P. BLACK

THE JOHN M. DIVEN MEMORIAL MEDAL COMMITTEE

L. R. HOWSON, *Chairman* G. E. FERGUSON PAUL WEIR
W. R. LADE, *Vice-Chairman* H. O. HARTUNG

THE JOHN M. GOODELL PRIZE COMMITTEE

RICHARD HAZEN, *Chairman* F. C. AMSBARY L. W. GRAYSON
J. E. KIKER JR., *Secretary*

CONVENTION PLACE COMMITTEE*Representatives of AWWA*

A. P. BLACK, *Chairman*
A. E. BERRY
W. V. WEIR
H. E. JORDAN, *Ex-Officio*

Representatives of WSWMA

C. N. BROWN
E. M. JONES
R. F. ORTH
J. G. STEWART, *Ex-Officio*

CONVENTION MANAGEMENT COMMITTEE—1953*Representatives of AWWA*

E. D. BARRETT, *Chairman* C. H. CAPEN, *Ex-Officio*
W. L. HARRIS H. E. JORDAN, *Ex-Officio*
T. L. VANDER VELDE RICHARD HAZEN, *Ex-Officio*

Representatives of WSWMA

E. M. JONES, *Ex-Officio*
J. G. STEWART, *Ex-Officio*
T. T. QUIGLEY
E. A. SIGWORTH

COMMITTEE ON NATIONAL WATER POLICY

ABEL WOLMAN, *Chairman* L. H. ENSLOW N. T. VEATCH
A. P. BLACK G. E. FERGUSON W. V. WEIR
E. S. CHASE S. B. MORRIS

**POLICY COMMITTEE ON FLUORIDATION OF PUBLIC
WATER SUPPLIES**

IV. JOINT COMMITTEES WITH OTHER ORGANIZATIONS**AWWA ACTIVITIES UNDER JURISDICTION OF BOARD OF DIRECTORS****Committee on Water and Sewage Works Development**

AMERICAN WATER WORKS ASSOCIATION
FEDERATION OF SEWAGE WORKS ASSOCIATIONS
NEW ENGLAND WATER WORKS ASSOCIATION
WATER & SEWAGE WORKS MANUFACTURERS ASSOCIATION

The committee was organized in 1943 to promote the planning and construction of water and sewage works systems. The activities of the committee were terminated at the end of 1945. The form of organization is held in the records against future needs for such cooperative action.

Committee on Federal Activities

AMERICAN WATER WORKS ASSOCIATION
MAINE WATER UTILITIES ASSOCIATION
NEW ENGLAND WATER WORKS ASSOCIATION

This committee was organized in 1941 to coordinate the activities of the water works industry in contacts with federal agencies. At the close of World War II, the committee became inactive. The form of organization is held in the records against future needs.

AWWA ACTIVITIES UNDER JURISDICTION OF COMMITTEE ON WATER WORKS ADMINISTRATION

Committee on Water Works Accounting Manual

*AMERICAN WATER WORKS ASSOCIATION
MUNICIPAL FINANCE OFFICERS ASSOCIATION*

This committee is responsible for the preparation of future editions of the "Manual of Water Works Accounting," which was first published in 1938.

REEVES NEWSOM

Representatives of AWWA

H. F. SMITH

Committee on Survival and Retirement Experience With Water Works Facilities

*AMERICAN WATER WORKS ASSOCIATION
INSTITUTE OF WATER SUPPLY UTILITIES*

Reports developed by this committee were published in 1947 as a bound volume entitled *Survival and Retirement Experience With Water Works Facilities*. The committee is inactive.

National Committee for Utilities Radio

This committee was established to coordinate the activities of the public utility services in their use of radio communication equipment. The National Committee is made up of representatives of eight national associations in the public utility field and ten regional groups of representatives of operating utilities.

AWWA ACTIVITIES UNDER JURISDICTION OF COMMITTEE ON WATER WORKS PRACTICE

Joint Editorial Committee on Standard Methods for the Examination of Water and Sewage

*AMERICAN PUBLIC HEALTH ASSOCIATION
AMERICAN WATER WORKS ASSOCIATION
FEDERATION OF SEWAGE WORKS ASSOCIATIONS*

Standard Methods for the Examination of Water & Sewage has been issued jointly by the American Water Works Assn. and the American Public Health Assn. since 1925. The Federation of Sewage Works Associations has now joined these Associations in sponsoring the work of this committee and will participate in the preparation of the Tenth and future editions. The Editorial Board is responsible for the content of the text. The Eighth Edition was published in 1936; the Ninth Edition in 1946. The Editorial Board responsible for the preparation of the Tenth Edition consists of:

H. A. FABER, *Repr. AWWA*
M. H. McCABY, *Repr. APHA*
W. D. HATFIELD, *Repr. FSWA*

Joint Research Committee on Boiler Feedwater Studies

*AMERICAN BOILER MANUFACTURERS ASSOCIATION
AMERICAN RAILWAY ENGINEERING ASSOCIATION
AMERICAN SOCIETY OF MECHANICAL ENGINEERS
AMERICAN SOCIETY FOR TESTING MATERIALS
AMERICAN WATER WORKS ASSOCIATION
EDISON ELECTRIC INSTITUTE*

This committee plans and controls research on certain problems associated with boiler feedwater. It is composed of an executive subcommittee and technical subcommittees.

M. D. BAKER

B58—Deep Well Vertical Pumps

This committee is charged with the formulation of American Standards for Deep Well Vertical Turbine Pumps, including materials, dimensions, production ratings and methods of testing of vertical turbine pumping equipment designed to lift water, at normal temperature, from underground sources. The equipment to be standardized consists of three elements: (1) the head and driver assembly; (2) the column/shaft assembly or conductor system; and (3) the pump unit proper.

The committee was organized in 1949 under ASA procedure with AWWA as sponsor.

PIPE lines don't "shrink" when the interior surfaces are coated with a spun lining of Bitumastic 70-B Enamel . . . because this durable enamel *prevents* rust, corrosion, incrustation and tuberculation.

When the inside diameter of your pipe line *stays* the same through the years, you select pipe solely on the basis of desired capacity. You don't waste money by specifying *over-sized* pipe in order to allow for future "shrinkage." When your pipe line's coefficient of flow *stays* high, you don't have to replace pumps with bigger ones that cost more to buy and operate.

Bitumastic 70-B Enamel is equally effective in protecting exterior surfaces of pipe lines. It prevents pitting and leakage caused by soil corrosion. Give your steel pipe lines *lasting* protection, inside and out, with Bitumastic 70-B Enamel. Write for details.

Automatic Valves

ALTITUDE VALVE

Controls elevation of water in tanks, basins and reservoirs

1. Single Acting
2. Double Acting

REDUCING VALVE

Maintains desired discharge pressure regardless of change in rate of flow

Regulates pressure in gravity and pump systems; between reservoirs and zones of different pressures, etc.

FLOAT VALVE

Maintains levels in tank, reservoir or basin

1. As direct acting
2. Pilot operated and with float traveling between two stops, for upper and lower limit of water elevation.

Maintains safe operating pressures for conduits, distribution and pump discharge

SURGE-RELIEF VALVE

A self contained unit with three or more automatic controls

COMBINATION VALVE

Combination automatic control both directions through the valve.

Electric remote control— solenoid or motor can be furnished

REMOTE CONTROL VALVE

Adapted for use as primary or secondary control on any of the hydraulically controlled or operated valves.

Packing Replacements for all Ross Valves Through Top of Valve

ROSS VALVE MFG. CO., INC., P. O. BOX 593, TROY, N. Y.

buy with an eye to tomorrow!

"I haven't had to touch the Chlorinizer for the last six months except to change tanks."

"That chlorine control valve in Builders Chlorinizers is great! I can forget all about it, because I know it's not deteriorating in a bath of corrosive wet chlorine gas."

People who have switched to BUILDERS Visible Flow CHLORINIZERS are delighted with the performance they get from these chlorine gas feeders. Here are typical comments:

"A glance at the Sightflo indicator shows we're getting the right chlorine feed. With this positive flow rate indicator, Chlorinizers eliminate a lot of guess-work and worry in our plant."

Chlorinizers are simple, easy to understand. Chlorinizers meter and control chlorine gas in the dry, non-corrosive state. Chlorinizers have a closed chlorine flow line, totally free from stuffing boxes and mechanisms needing frequent attention. Chlorinizers have only one vital control part, the tantalum-diaphragm chlorine valve with its Hastelloy valve pin, silver valve seat, and enameled valve lining.

These are the big values you get in Builders Chlorinizers . . . and they're sure to save you maintenance for years to come. Chlorinizers are available in three volumetric models — for any chlorination service:

Up to 400 lbs./day . . . Model DVSX . . . Bulletin 840-F2A
Up to 2000 lbs./day . . . Model CVS . . . Bulletin 840-F1
Up to 6000 lbs./day . . . Model HCVS . . . Bulletin 840-G27

NATIONAL KNOW-HOW PAYS!

National knows how to work quickly reducing supplementary labor costs and service interruptions.

National knows how to clean the difficult jobs, including hard incrustations, unusual obstructions and pipes of unusually large or small diameter.

National knows how to clean long runs with a minimum number of pipe entries.

National knows how to avoid trouble, such as can occur from improper provision for drainage of flush water from large mains or from the use of excessive pressures.

National knows how to clean so thoroughly that restoration of 95% of the original pipe capacity is guaranteed.

National Know-How comes from over 40 years of experience cleaning water mains.

Write or call today for information and prices.

CLOW

Cast Iron Pipe & Fittings

Long life is the real test of pipe line economy. Clow Cast Iron Pipe and Fittings give you that long life service...for a century and more...and offer the surest way to keep your municipal water supply system at peak efficiency—now and in the years ahead! City officials throughout the nation have long ago proved that it actually costs less to use Clow Cast Iron Pipe and Fittings. They have found that after installation, practically no maintenance, repair or replacement is necessary. So prove to yourself that Clow Cast Iron Pipe and Fittings will be a wise investment of public funds!

Clow Cast Iron Pipe Fittings

All types of Clow Cast Iron Pipe Fittings are offered in straight and reducing sizes for use with Bell and Spigot Joint, Mechanical Joint, and Flanged Joint cast iron pipe.

Bell & Bell One-Eighth Bend

Mechanical Joint 90° Elbow

90° Standard Flanged Elbow

Special Fittings

Clow Foundries are well equipped to produce your special fittings promptly and accurately, to meet particular requirements, and to solve unusual installation problems.

Write for Price and Delivery

Clow Cast Iron Pipe is centrifugally cast—in sizes from 3 to 24", in 18' lengths, and for working water pressures to meet your requirements. Meets Federal Specifications WW-P-421 for Bell and Spigot Cast Iron Pipe for Water. Clow pipe can be easily cut in the field if needed, and drilling and tapping it for services results in superior threads and perfect connections.

CAST IRON

Bell and Spigot Joint

The common bell and spigot type of cast iron pipe joint with standard water bell... for poured and caked lead make up.

Clow Mechanical Joint
 A time-saving, easily installed mechanical cast iron pipe that reaches the job with all joint materials complete.

Flanged Joint
 For exposed pipeline work. Flange dimensions and drilling conform to requirements of A.S.A. Class 125 for flanged fittings and valves.

THE ROOTS DON'T SHOW.....

IN W & T CHLORINATORS, EITHER

The unseen roots of a beautiful tree give it life and strength. So, too, do the unseen features back of a W&T Chlorinator—basic research, service, and a complete line of equipment—ensure dependability and trouble-free operation throughout the years.

Basic research, for example, while not necessarily essential to each particular installation, is, nevertheless, the life blood of sound equipment. W&T research developed the Visible Vacuum Principle, residual recording, the Break-Point Process and countless other advances in the art of chlorination. This same research is constantly at work to insure that the W&T equipment you buy is up-to-date in every respect and will not be outmoded before its time.

The desire for that assurance may be another reason for the ever growing demand for W&T Chlorinators.

Transite PRESSURE PIPE will give you all 3 ...

1 LOWER INSTALLATION COSTS

Water lines are quickly assembled and pipe crews lay more pipe per day . . . when Transite* Pressure Pipe is used for your water lines. That's because Transite is light in weight, easy to handle . . . because joints are easily made and readily checked during assembly . . . and because most pipe sizes can be unloaded from trucks and lowered into the trench without use of mechanical handling equipment.

2 LOWER OPERATING COSTS

Transite Pressure Pipe has a smooth interior surface that offers very little resistance to the flow of water. Furthermore, its initial high flow capacity ($C=140$) cannot be reduced by tuberculation . . . the internal corrosion that often reduces the flow capacity of ordinary water pipe. This helps assure high pressures and an ample volume of water for future requirements . . . helps keep pumping costs low.

3 LOWER MAINTENANCE COSTS

Transite is made of asbestos and cement by a special J-M process that develops exceptional resistance to corrosion . . . outside, inside and all the way through! Also, Transite's tight, flexible joints guard against underground leakage and joint failures. Many communities now using Transite Pipe have realized greater savings in installation, operating and maintenance costs . . . have been able to give better service and often lower water rates to their customers.

Investigate Transite today! Your local Johns-Manville sales office will give you all the facts . . . or you can write direct to:

FIRE HYDRANTS

Main valve mechanically locked shut by steel forgings bearing against case. Special rubber valve seats will not scar or leak. Solid bronze insures long life of vital parts. Drains fast, without clogging. No water hammer. No flooding if barrel is broken. No digging to renew broken barrel, thanks to flange at ground line. One man, just by opening valve and removing head, can easily take out and replace all working parts of the Rensselaer Fire Hydrant. No special tools or hoist needed. Thousands in satisfactory service.

GATE VALVES

DOUBLE DISC

In closing these valves, gates are WEDGED tight, the moment they reach closing point opposite seats. In opening, the wedge is positively held and mechanically released by very first turn of valve stem, loosening BOTH gates. Additional turns lift loosened gate to full open position. Thus Rensselaer wedge-action means easy closing and opening, minimizes frictional wear on gate and seat rings. Simple, rugged construction.

SQUARE BOTTOM

The pioneer valve supporting the downstream gate in THREE places at EVERY point in its travel. Constant 3-point support eliminates tendency of downstream gate to tilt into downstream port opening when partly open, and scar the face of gate and seat rings. During entire operation, stainless steel tracks hold gate free of seat ring, until near closing point—then tracks taper, allowing contact. Recommended for emergency shut-off, frequent operation, throttling service, vertical pipe lines.

AUXILIARY FEATURES

Cylinder or motor operation available for remote control, group operation or fast operation. By-passes and gearing are standard equipment on larger sizes, and available on smaller sizes.

CHECK VALVES

Rensselaer Check Valve construction is simple, and head loss comparatively low. The lever-and-adjustable-spring-construction eliminates SLAM by sealing the gate at the same instant the water column in the line comes to rest. Ideal for pumping plants; marine service; drydocks; fire protection systems.

TAPPING SLEEVES AND VALVES

Tapping and Repair Sleeves—Sleeves long and heavy. Resist line pressure and caulking strains. Centering rings provide stop for caulking, save caulking materials. Space between flanges makes thick lead gaskets accessible to caulking tool for full length of sleeve, insuring watertight joint. **Tapping Valves**—standard Double Disc Gate Valves are fitted with oversize seat rings to permit use of full size cutters. Flange on one end machined and drilled for perfect alignment with sleeves and crosses.

LEADERSHIP FOR OVER 65 YEARS

96%

ARE
STILL IN SERVICE

We are stating a fact and you don't have to take our word for it. We refer you to one of the most important fact-finding jobs ever undertaken by the water works industry—a survey of the service life of water works facilities. This survey was sponsored by three water works associations.

The survey shows that 96% of all the cast iron water mains ever laid by 25 representative cities in sizes 6-inch and larger *are still in service*.

A detailed report of the survey has been published by the American Water Works Association. We have reprinted, by permission, the facts pertaining to cast iron water mains in a brochure which will be sent on request. Write to Cast Iron Pipe Research Association, Thomas F. Wolfe, Managing Director, 122 South Michigan Ave., Chicago 3, Ill.

CAST IRON

CAST IRON PIPE SERVES FOR CENTURIES

It really pays to TAKE GOOD CARE OF YOUR METERS

SOME PRACTICAL HINTS ON METER MAINTENANCE

HAVE REGULAR REPAIR SCHEDULES

It is advisable to have a fixed time for removing and inspecting meters. It is also good practice to install replacements so that metered service will not be interrupted.

CLEANING MAY SUFFICE

Experience shows that in a great many instances a thorough cleaning of the working parts is often all the meter maintenance required.

DEGREE OF WEAR DETERMINES REPAIR

In servicing very old, worn meters, it is usually advisable to replace complete units, such as gear trains, discs or chambers and occasionally registers.

TEST BEFORE INSTALLING

All repaired meters should be tested before installation. In the interests of greater revenue, it is suggested that a repaired meter test at least 90% on a 1/4 gpm flow.

USE THE RIGHT TOOLS

Proper tools will facilitate meter repair work. Rockwell Manufacturing Company has developed a complete package of repair tools available at nominal cost.

STORE METERS UPSIDE DOWN

New or repaired meters should be stored in a cool place, preferably upside down. Prolonged exposure to heat in an unventilated building can have damaging results.

IT'S A GOOD IDEA to keep your meters running like new by installing Rockwell interchangeable parts. Then you'll be assured of a longer useful life of accurate registration. Our stock of repair parts is complete and we can make prompt shipment. Write today for fully illustrated parts catalogs.

SAVE MONEY 7 WAYS

With This Steel Water Pipe

You can install water supply and force mains quickly and at less cost with Armco Welded Steel Pipe. Here are seven reasons why:

1. Choose the exact wall thickness you need ($\frac{1}{4}$ - to $\frac{1}{2}$ -inch). No need to use unnecessary metal.
2. Match the pipe diameter (6 to 36 inches) with your specific needs. Avoid buying unneeded capacity.
3. Armco Pipe is easy to handle; installation costs are low.
4. Long lengths, up to 50 feet, mean fewer joints to make, less assembly cost.
5. Protect against costly failures. Armco Pipe has ample strength and ductility to withstand pressure surges and heavy external loads.
6. Spun enamel lining prevents tuberculation, assures continued high flow capacity, stops costly cleaning.
7. Prefabricated standard or special fittings are no problem with Armco Pipe.

Why not take advantage of these 7 plus values and specify Armco Welded Steel Water Pipe for that next job. Write for complete data. Armco Drainage & Metal Products, Inc., Welded Pipe Sales Division, 1452 Curtis St., Middletown, O. Subsidiary of Armco Steel Corporation.

TANK with a FUTURE

This tank in some respects looks like hundreds of others, but unlike many, it has a brighter future of longer life and greater service, because it is protected by an Electro Rust-Proofing system.

Efficient control of corrosion on submerged surfaces requires much engineering, some equipment. Careful analysis of your problem . . . design, installation and testing by men who are experienced in their work . . . the "know-how" of an established firm . . . "follow through" of every job—on these and similar engineering details rest effective cathodic protection.

Highly trained, backed by a long list of successful installations and years of experience, our engineer is always ready to help you solve your corrosion problem. For complete information, write today.

4 STEPS TO BETTER WATER

WATER CONDITIONING
HEADQUARTERS FOR
40 YEARS

1. PERMUTIT PRECIPITATORS—For coagulation of turbid or colored waters and for softening hard waters. Uniform upward filtration through sludge blanket saves from 10% to 40% in chemicals . . . up to 50% in space and 75% in time. Available in horizontal or vertical designs, in single units or batteries, with unit capacities up to 10,000,000 gpd.

2. PERMUTIT ZEOLITE (Ion Exchanger) WATER SOFTENERS—Simplest method of removing hardness to any required degree. Completely automatic operation assures uninterrupted service and reduces operating costs. Supplied in single units or batteries to fit all requirements.

3. PERMUTIT SPIRACTORS[®]—New principle —catalytic precipitation—shortens detention time, eliminates sludge disposal, saves steel, floor space. No moving parts. Total reaction time is 8 minutes.

4. PERMUTIT MONOCRETE UNDERDRAINS—Rugged monolithic construction. Non-corrodible, easy to install. Large laterals and header assure uniform collection and distribution of water. Laterals are formed by specially designed inflatable rubber tubes which are removed after the concrete is set.

For full information on these and other types of water conditioning equipment, write to The Permutit Company, Dept. JA-7, 330 West 42nd Street, New York 36, N. Y., or The Permutit Company of Canada, Ltd., 6975 Jeanne Mance Street, Montreal.

PERMUTIT

FLEXIBLE BOLTED CONNECTION

M & H Mechanical Joint ends on gate valves are identical with mechanical joint standards adopted by the Cast Iron Pipe Research Association. It uses the stuffing box principle, by which a thick gasket is compressed into a stuffing box by a bolted gland or follower ring. It is a flexible, bottle tight joint, easy to make, and economical. Mechanical joint making in the field does not require a skilled workman. Mechanical joint permits deflection in any direction, also longitudinal expansion and contraction.

For complete information, write or wire

AQUA NUCHAR ACTIVATED CARBON

Aqua Nuchar is quality of activated carbon specifically produced for water purification. Its characteristic is a high adsorptive power for those foreign molecules in water which give rise to objectionable odors. Aqua Nuchar offers the quickest, lowest-cost way to eliminate odors and prevent their recurrence. It is estimated that the year 'round use of Aqua Nuchar Activated Carbon costs on an average less than two cents per capita per year.

With the increase in use of activated carbon in water treatment, competitive carbons and competitive treatments entered the field. Thus it became necessary to develop tests and suitable specifications whereby municipalities would be able to select the activated carbon most suitable for their individual needs.

Development of the Threshold Odor Test supplied the means of measuring odor intensities in water and by means of this test it is possible to determine that quality of carbon which will be most effective for removing odors from the individual supply. Municipal officials are invited to write us for full information regarding this test.

Members of our Research Staff have carried on evaluation test, comparing Aqua Nuchar with competitive materials for ability to remove odors.

Odors in water are frequently erroneously characterized as tastes. Psychologists recognize four taste sensations: salt, sweet, sour and bitter. Perhaps the greatest cause of odor in water supplies is due to Algae. Odor is occasionally caused by trade wastes, resulting in very severe odor epidemic. Aqua Nuchar removes these odorous compounds in water, thus enabling delivery of a palatable water to the consumer at all times.

Even where there has been no consumer complaint, many plants apply small

dosages of Aqua Nuchar in order to prevent a sudden taste or odor condition from getting out of hand. Thus, when tastes and odors develop in a raw water supply, it is only necessary to apply somewhat increased dosages of Aqua Nuchar to control the condition.

AQUA NUCHAR HAS THESE SPECIAL QUALITIES: It disperses more quickly throughout the entire body of water and remains in suspension a longer period of time. Thus the carbon particles have a greater opportunity to contact taste and odor bodies in the water in order to accomplish their REMOVAL BY ADSORPTION.

It is common practice in the design of new plants to provide for activated carbon treatment of the water. Application of Aqua Nuchar Activated Carbon is advisable not only in all water supplies where tastes and odors become apparent after chlorination. It is a wise precaution under all circumstances.

During floods and high water, odorous compounds may be flushed down to your water intake. Therefore at such times Threshold Odor Tests should be run regularly and you should be prepared with an adequate supply of Aqua Nuchar.

The manufacturers of Aqua Nuchar Activated Carbon offer the services of Technical Field Men to study your methods and recommend the proper place to add activated carbon. They have studied the taste and odor problems of hundreds of plants with surface water supplies and can quickly find the point at which activated carbon should be added to give optimum results.

Warehouse and factory stocks are maintained at strategic points throughout the country so that rush deliveries can usually be made within twenty-four hours or less by local express.

M. B. SKINNER CO.

Repair Clamps and Saddles for Steel and Cast Iron Pipe

South Bend, Ind.

Established 1898

SKINNER-SEAL EMERGENCY PIPE CLAMP

For stopping leaks in water mains or pipe lines —instantly, permanently. The standard pipe repair

the world over. Makes a tremendous saving over the old method of repairing leaks, as one man can apply it in ten minutes' time. Made of malleable iron; hinged along one side, with electro-plated steel bolts on the other. Bolt nuts always accessible from above. A gasket completes the clamp. Comes in both cast iron main and steel pipe sizes. Write for discount. Sizes $\frac{1}{2}''$ - $12''$ for both steel and cast iron pipe.

SKINNER-SEAL PIPE LINE CLAMP

The same principle as an Emergency Pipe Clamp, but about double the length. Especially valuable on splits, or cases of extended corrosion. Like the Emergency Pipe Clamp, it is made of malleable iron, is hinged along one side and provided with electro-plated tightening bolts. Tremendously rugged and strong. Economical in first cost and in installation because one man can apply it quickly and easily. An absolutely permanent repair. Write for discount.

Sizes: $\frac{3}{4}''$ - $6''$ C.I. for both steel and cast iron pipe.

SKINNER-SEAL BELL JOINT CLAMP

For stopping bell and spigot leaks permanently, under pressure. The only clamp with the following features: (1) The large soft gasket is completely SEALED—by Monel band at top, by hard gasket tip at rear. (2) Clamp is equipped with patented distortion-proof anchoring. (3) is completely adjustable to all variations in both pipe and bell sizes. (4) is made of malleable iron and equipped with $\frac{3}{4}''$ electro-plated steel bolts.

Sizes: $2''$ to $42''$. Net prices. Write for complete schedule.

Cross Section

SKINNER-SEAL SPLIT COUPLING CLAMP

For repairing clean breaks in cast iron pipe. Two malleable iron rings with intermeshing fingers, drawn together by heavy steel bolts, compress a double-taper soft gasket over the break and permanently shut off the leak. Gasket is completely sealed by Monel band at top and by hard gasket tips at the sides. Applied in 10 minutes. Self-adjusting fit.

Sizes $2''$ - $24''$.

ADVANCED BADGER ENGINEERING

brings you the DOVETAIL THRUST ROLLER INSERT

Because BADGER METER engineers refuse to "rest on their laurels," they continue to maintain the world's highest standards of water meter performance. This new Badger Dovetail Thrust Roller Insert is typical of the constructive research and precision achievements in progress continually at BADGER.

What does this Badger Dovetail Thrust Roller Insert accomplish? It saves important time and replacement costs... because, with this removable plate set into the chamber wall, the thrust roller (in the disc) rolls against the *insert* only... thus preventing wear directly in the chamber thrust roller slot (which would damage the chamber itself). If wear occurs on the *insert*, that is no problem, because it can be replaced easily, at a small frac-

tion of the cost and time required to replace an entire new chamber.

In addition, advanced Badger engineering of this unique insert assures you of accurate metering through unimpaired freedom of disc movement, because:

- 1** Both halves of chamber remain stronger, since this insert requires only a short slot (about 77% shorter slot milled in chamber wall).
- 3** The precision dovetail design prevents insert from shifting or moving.
- 2** Precision design and machining permit insert to be held accurately and securely in place between the two halves of the chamber.
- 4** The increased radius of the insert along the area nearest the disc, assures ample clearance always between disc and insert, even in the extreme allowable vertical shift.

Only in BADGER METERS will you find this advanced type of engineering and precision production which has convinced waterworks men in over 5000 communities that "BADGERS are the best buy in meters."

...another "BADGER-First"

A New style: 77% shorter slot... adds strength to chamber-halves; prevents distortion.

B Old style: This full length slot weakened the chamber-halves... made them subject to distortion.

ASK ABOUT OTHER REASONS WHY YOU'LL DO BETTER WITH BADGERS.

AMERICAN WATER WORKS ASSOCIATION

PUBLICATIONS

Effective December 1, 1952

Orders should be sent to the American Water Works Association, Inc., 521 Fifth Ave., New York 17, N.Y. Payment is required in advance, in U.S. funds, from nonmembers.

BOOKS

Index to Proceedings & Journal AWWA (1881-1939)—This cloth-bound, 285-p. index covers the Proceedings for 1881-1913 and the JOURNAL for 1914-1939. Price, for general sales, \$2.00; to members paying in advance, \$1.60.

Index to Journal AWWA, 1940-1944—Paper-bound supplement to *Index to Proceedings and Journal AWWA*. 64 pp. March 1945. Paper-bound. Price, for general sales, \$1.00; to members paying in advance, 80¢.

Manual of Water Works Accounting—Prepared jointly by the AWWA and the Municipal Finance Officers Association, this 500-page Manual contains twenty chapters covering all utility accounting practices. 1938; 2nd printing, 1951. Price, for general sales, \$4.00; to members paying in advance, \$3.20.

The Quest for Pure Water—By M. N. Baker. A history of water purification from the earliest records to the 20th century. 73 illustrations, 900 references, 527 pp. 1948; 2nd printing, 1949. Price, for general sales, \$5.00; to members paying in advance, \$4.00.

Standard Methods for the Examination of Water and Sewage—Published jointly by

the AWWA and the American Public Health Association. Cloth bound, 300 pages. Ninth edition, 1946. Available through the American Public Health Association, 1790 Broadway, New York 19, N.Y., at \$4.00, net.

Survival and Retirement Experience With Water Works Facilities—Prepared by a joint committee of the AWWA and the Institute of Water Supply Utilities. Includes reports published in installments in JOURNAL, 1945-46, with additional material and summary tables. Cloth bound, 566 pp. 1947. Price, for general sales, \$3.00; to members paying in advance, \$2.40.

Water Quality and Treatment—A manual prepared by AWWA. A comprehensive survey of water quality standards and procedures for purification, softening and other conditioning. Completely revised and enlarged second edition. 451 pp. 1950; 2nd printing, 1951. Price, for general sales, \$5.00; to members paying in advance, \$4.00.

Manual of British Water Supply Practice—A publication of the Institution of Water Engineers, London; distributed in U.S. by AWWA. The essence of the water supply art, as practiced in Great Britain. Cloth bound, 900 pp. 1950. \$7.50, net.

PERIODICALS AND PAMPHLETS

Journal American Water Works Association. A monthly magazine of technical papers, discussions, news and reports. Issued quarterly from 1914 to 1919; bi-monthly from 1920 to September 1924; monthly ever since. Annual indexes are contained in the December issue of each year from 1940 on. Cumulative indexes of authors and articles grouped by topics are described on p. 1. Subscriptions only in conjunction with AWWA membership in U.S., Canada and Cuba, or \$7.00 to libraries; not sold to individuals. Postage: to Canada, 20¢ additional; other foreign (except Pan-American Union), 80¢. Single copy price (of issues from 1925 on), for general sales, 75¢; to AWWA members, 50¢.

Fluoridation of Public Water Supplies. Reference and background information, including responsible opinions and essential facts. No. 19 of the *Willing Water* series, October 1952. 8 pp., 10¢.

What Price Water? A brochure planned for the layman to explain expenditures for water utility operations and services. 14 pp., il., 25¢. (Quantity rates on request.)

Willing Water. A catalog and price list of the *Willing Water* cartoon illustrations available in electrotype or newspaper mat form, for use in printing and advertising work. No charge.

JOURNAL REPRINTS

Order by title and number, not by topic. Reprints are not normally furnished punched for loose-leaf binding. Copies of Journal articles not available in reprint form can generally be obtained by ordering a copy of the issue in which they were published; for terms, see "Journal AWWA" in preceding "Periodicals and Pamphlets" section.

Air Conditioning. No. 263. Committee Report: Regulation of Air Conditioning and Other Refrigeration. Includes a suggested model ordinance regulating installation and operation of air-conditioning and refrigeration equipment. From December 1950 JOURNAL. 9 pp., 20¢.

Annual Reports. No. 246. Committee Report: Water Department Annual Reports. Includes a guide to the preparation of an annual statistical report. From August 1950 JOURNAL. 14 pp., 20¢.

Grounding. No. 270. A.W.W.A. Policy Statement: Grounding of Electric Circuits on Water Pipe. Also C. F. Meyerherm: Water Works Industry's Attitude on Grounding and Stray Current Problems. From April 1944 and December 1945 JOURNALS. 4 pp., 10¢.

Pension Legislation. No. 254. Committee Report: State Pension and Retirement Legislation in 1949. From October 1950 JOURNAL. 8 pp., 15¢.

Pipe. No. 251. R. E. Barnard: Design Standards for Steel Water Pipe. From January 1948 JOURNAL. 64 pp., 45¢.

Pipe. No. 248. W. H. Cates: Design Standards for Large-Diameter Steel Water Pipe. From September 1950 JOURNAL. 27 pp., 30¢.

Radioactivity. No. 227. A. E. Gorman: Radioactivity—A New Factor in Water Works Practice. Also Placak & Morton: Research on the Disposal of Radioactive Wastes. From December 1949 and February 1950 JOURNAL. 16 pp., 20¢.

Rates. No. 256. L. E. Ayres: Basic Considerations in Determining Water Rates. From November 1950 JOURNAL. 22 pp., 25¢.

Regulations. No. 269. California Section Report: Tentative Regulations Governing Water Service. From April 1951 JOURNAL. 14 pp., 20¢.

Resources. No. 278. Morris, Wolman, Pirnie and others. A series of reviews of the President's Water Resources Policy Commission Report. From June 1951 JOURNAL. 32 pp., 30¢.

- Resources.** No. 280. Roy R. Green: Water Use in Industry. From August 1951 JOURNAL. 12 pp., 20¢.
- Resources.** No. 194. Committee Report: National Policy on Water Resources. *Also* A.W.W.A. Policy Statement: Information Concerning Water Resources; and Executive Committee Statement: Allocation of Colorado River Water. From July 1948 JOURNAL. 8 pp., 15¢.
- Safety.** No. 109. Task Group Report: Safety Practices. From June 1951 JOURNAL. 12 pp., 20¢.
- Softening.** No. 272. L. R. Howson: Economics of Water Softening. From April 1951 JOURNAL. 7 pp., 15¢.
- Statistics.** No. 221. W. B. Langbein: Municipal Water Use in the United States. From November 1949 JOURNAL. 5 pp., 15¢.
- Statistics.** No. 192. G. J. Schroepfer et al.: A Statistical Analysis of Water Works Data for 1945. From October 1948 JOURNAL. 32 pp., 30¢.
- Treatment.** No. 268. Committee Report: Capacity and Loadings of Suspended Solids Contact Units. From April 1951 JOURNAL. 29 pp., 30¢.
- Writing.** No. 271. A Style Manual for Journal Authors. Includes an explanation of editing and publication procedure; directions for preparing tables, illustrations and references for publication; a list of abbreviations used in the Journal A.W.W.A.; and tips on oral presentation. From the May 1947 JOURNAL. 16 pp., 20¢.

AWWA STANDARDS

EXPLANATORY NOTE: Effective October 31, 1951, the designations for AWWA standards (such as specifications, procedures and recommended practices) were revised and systematized (*see* October 1951 JOURNAL AWWA, p. 851). To minimize confusion, both the old and the new designations will be carried on publications lists and on the specifications themselves for a considerable period.

A—Source

AWWA A100-46 (formerly 4A.1-1946)—Standard Specifications for Deep Wells. Approved as Tentative on April 30, 1945,

and published in the September 1945 JOURNAL. Made Standard on May 10, 1946; appendix added June 18, 1952. 54 pp., 65¢.

B—Treatment

B100—Filtration

AWWA B100-50 (formerly 5C-1950)—Standard Specifications for Filtering Material. Revision of 1943 document approved as Tentative Nov. 15, 1948, and published in the March 1949 JOURNAL. Made Standard Jan. 16, 1950. 16 pp., 25¢.

B200—Softening

AWWA B200-49T (formerly 5W1.01-1949)—Tentative Standard Specifications for Sodium Chloride. Approved as Tentative Jul. 6, 1949, and published in the March 1950 JOURNAL. 10 pp., 25¢.

AWWA B201-51T—Tentative Standard Specifications for Soda Ash. Approved as Tentative Oct. 15, 1951, and published in the February 1952 JOURNAL. 6 pp., 20¢.

AWWA B250-51 (formerly 5Z-1951)—Standard Manual of Cation Exchanger Test Procedures. Revision of 1943 document approved as Tentative Dec. 31, 1948, and published in the May 1949 JOURNAL. Made Standard May 4, 1951. 28 pp., 40¢.

B400—Coagulation

AWWA B400-49T (formerly 5W1.10-T-1950)—Tentative Standard Specifications for Ammonium Sulfate. Approved as Tentative July 15, 1949, and published in the Nov. 1950 JOURNAL. 7 pp., 20¢.

AWWA B401-50T (formerly 5W1.30-T-1950)—Tentative Standard Specifications for Bauxite. Approved as Tentative Apr. 28, 1950, and published in the July 1950 JOURNAL. 8 pp., 20¢.

AWWA B402-49T (formerly 5W1.31-T-1950)—**Tentative Standard Specifications for Ferrous Sulfate.** Approved as Tentative May 31, 1949, and published in the October 1950 JOURNAL. 7 pp., 20¢.

AWWA B403-52T—Tentative Standard Specifications for Aluminum Sulfate. Approved as Tentative Aug. 21, 1952, and published in the November 1952 JOURNAL. 10 pp., 25¢.

B500—Scale and Corrosion Control

AWWA B500-50T (formerly 5W1.60-T-1950)—**Tentative Standard Specifications for Trisodium Phosphate.** Approved as Tentative Apr. 3, 1950, and published in the June 1950 JOURNAL. 6 pp., 20¢.

AWWA B501-51T—Tentative Standard Specifications for Caustic Soda. Approved as Tentative Oct. 15, 1951, and

published in the December 1951 JOURNAL. 6 pp., 20¢.

B600—Taste and Odor Control

AWWA B600-49T (formerly 5W1.70-T-1950)—**Tentative Standard Specifications for Powdered Activated Carbon.** Approved as Tentative July 11, 1949, and published in the February 1951 JOURNAL. 14 pp., 25¢.

B700—Prophylaxis

AWWA B700-49—The Fluoridation of Public Water Supplies. A statement of recommended policy and procedure approved on May 29, 1949, and published in the July 1949 JOURNAL. 5 pp., 20¢.

AWWA B701-50T (formerly 5W1.90-T-1950)—**Tentative Standard Specifications for Sodium Fluoride.** Approved as Tentative July 21, 1950, and published in the September 1950 JOURNAL. 7 pp., 20¢.

C—Distribution

C100—Cast-Iron Pipe, Fittings

AWWA C100-08 (formerly 7C.1-1908)—**Standard Specifications for Cast-Iron Special Castings.** Originally approved May 12, 1908, as "Standard Specifications for Cast-Iron Water Pipes and Special Castings," the portion of this document dealing with pipe has been superseded by ASA A21.2-1939, which is listed below as AWWA C102-39. 36 pp., 55¢.

AWWA C101-39 * (ASA A21.1-1939)—**American Recommended Practice Manual for the Computation of Strength and Thickness of Cast-Iron Pipe.** Adopted by AWWA and the American Standards Assn. December 1939 and published in the December 1939 JOURNAL. 81 pp., 65¢.

AWWA C102-39 * (ASA A21.2-1939)—**American Standard Specifications for Cast-Iron Pit-Cast Pipe for Water or Other Liquids.** Adopted by AWWA and the American Standards Assn. December 1939 and published in the December 1939 JOURNAL. 23 pp., 45¢.

AWWA C104-39 * (ASA A21.4-1939)—**American Standard Specifications for Cement-Mortar Lining for Cast-Iron Pipe and Fittings.** Adopted by AWWA

and the American Standards Assn. December 1939 and published in the December 1939 JOURNAL. 9 pp., 35¢.

AWWA C110-52 * (ASA A21.10-1952)—**American Standard Specifications for Short-Body Cast-Iron Fittings, 3 Inch to 12 Inch, for 250-psi Water Pressure Plus Water Hammer.** Adopted by AWWA and the American Standards Assn. Sept. 30, 1952, and published in the November 1952 JOURNAL. 10 pp., 35¢.

C200—Steel Pipe

AWWA C201-50 (formerly 7A.3-1950)—**Standard Specifications for Electric Fusion Welded Steel Water Pipe of Sizes 30 Inches and Over.** Published as Tentative in the January 1940 JOURNAL and made Standard Apr. 25, 1940. Latest revision June 21, 1950. 20 pp., 30¢.

AWWA C202-49 (formerly 7A.4-1949)—**Standard Specifications for Steel Water Pipe of Sizes up to but Not Including 30 Inches.** Published as Tentative Revision of 1941 document in the April 1943 JOURNAL. Made Standard Oct. 3, 1949. Latest revision June 21, 1950. 28 pp., 40¢.

AWWA C203-51 (formerly 7A.5-1950)—**Standard Specifications for Coal-Tar Enamel Protective Coatings for Steel Water Pipe of Sizes 30 Inches and Over.** Published as Tentative in the

* AWWA designations have been assigned mainly for indexing purposes. It is expected that the American Standards Association's "A21" designation will normally be used.

January 1940 JOURNAL and made Standard Apr. 25, 1940. Latest revision May 1, 1951. 28 pp. (reprinted under same cover as AWWA C204-50, description of which follows).

AWWA C204-51 (formerly 7A.6-1950)—**Standard Specifications for Coal-Tar Enamel Protective Coatings for Steel Water Pipe of Sizes up to but Not Including 30 Inches.** Published as Tentative in the January 1940 JOURNAL and made Standard Apr. 25, 1940. Latest revision May 1, 1951. 24 pp. (reprinted under same cover as AWWA C203-50), 60¢.

AWWA C205-41 (formerly 7A.7-1941)—**Standard Specifications for Cement-Mortar Protective Coating for Steel Water Pipe of Sizes 30 Inches and Over.** Published as Tentative in the January 1940 JOURNAL and made Standard June 26, 1941. *Revision pending.* 16 pp., 25¢.

AWWA C206-50 (formerly 7A.8-1950)—**Standard Specifications for Field Welding of Steel Water Pipe Joints.** Approved as Tentative Jan. 10, 1946, and published in the March 1946 JOURNAL. Made Standard Nov. 27, 1950. Latest revision Oct. 3, 1949. 12 pp., 25¢.

AWWA C207-52T—**Tentative Standard Specifications for Steel Pipe Flanges.** Approved as Tentative May 9, 1952, and published in the October 1952 JOURNAL. 9 pp., 25¢.

C300—Concrete Pipe

AWWA C300-47T (formerly 7B.1-T-1947)—**Tentative Standard Specifications for Reinforced Concrete Water Pipe—Steel Cylinder Type, Not Prestressed.** Approved as Tentative Dec. 11, 1947, and published in the March 1948 JOURNAL. 14 pp., 25¢.

AWWA C301-49T (formerly 7B.2-T-1949)—**Tentative Standard Specifications for Reinforced Concrete Water Pipe—Steel Cylinder Type, Prestressed.** Approved as Tentative Nov. 21, 1949, and published in the December 1949 JOURNAL. 16 pp., 25¢.

AWWA C302-51T—**Tentative Standard Specifications for Reinforced Concrete Water Pipe—Noncylinder Type, Not**

Prestressed. Approved as Tentative Sept. 4, 1951, and published in the October 1951 JOURNAL. 15 pp., 25¢.

C500—Valves and Hydrants

AWWA C500-52T (formerly 7F.1)—**Tentative Standard Specifications for Gate Valves for Ordinary Water Works Service.** Revision of 1938 document approved May 9, 1952, and published in the September 1952 JOURNAL. 16 pp., 25¢.

AWWA C501-41T (formerly 7F.2-T-1941)—**Tentative Specifications for Sluice Gates.** Approved as Tentative June 26, 1941, and published in the October 1941 JOURNAL. 11 pp., 25¢.

AWWA C502-40 (formerly 7F.3-1940)—**Standard Specifications for Fire Hydrants for Ordinary Water Works Service.** Approved as Standard on January 17, 1940, and published in the August 1940 JOURNAL. 12 pp. (printed under same cover as C503-37, description of which follows), 25¢.

AWWA C503-37 (formerly 7F.3-1937)—**Standard Specifications for Uniform Marking of Fire Hydrants.** Published as Tentative in the April 1937 JOURNAL and made Standard June 7, 1937. (Printed under same cover as C502-40).

C600—Pipelining

AWWA C600-49T (formerly 7D.1-T-1949)—**Tentative Standard Specifications for Installation of Cast-Iron Water Mains.** Revision of 1938 document approved as Tentative June 3, 1949, and published in the December 1949 JOURNAL. 33 pp., 50¢.

AWWA C601-48 (formerly 7D.2-1948)—**A Procedure for Disinfecting Water Mains.** Approved Sept. 30, 1947, and published in the February 1948 JOURNAL. Latest revision, Sept. 15, 1948. 8 pp., 20¢.

C700—Meters

AWWA C700-46 (formerly 7M.1-1946)—**Standard Specifications for Cold Water Meters—Displacement Type.** Published as Tentative in the December 1941 JOURNAL and made Standard May 10, 1946. 12 pp., 25¢.

AWWA C701-47 (formerly 7M.2-1947)—**Standard Specifications for Cold Water Meters—Current Type.** Published as Tentative in the April 1946 JOURNAL and made Standard July 25, 1947. 12 pp., 25¢.

AWWA C702-47 (formerly 7M.3-1947)—
Standard Specifications for Cold Water Meters—Compound Type. Published as Tentative in the April 1946 JOURNAL and made Standard July 25, 1947. 11 pp., 25¢.

AWWA C703-49 (formerly 7M.4-1949)—
Standard Specifications for Cold Water Meters—Fire Service Type. Published as Tentative in the February 1947 JOURNAL and made Standard Jan. 18, 1949. 12 pp., 25¢.

AWWA C704-50 (formerly 7M.5-1950)—
Standard Specifications for Cold Water Meters—Current Type—Propeller Driven. Approved as Tentative July 21, 1949, and published in the August 1949 JOURNAL. Made Standard May 25, 1950. 12 pp., 25¢.

C800—Service Lines

AWWA C800-48 (formerly 7T.1-1948)—
Standard Specifications for Threads for Underground Service Line Fittings. Approved as Tentative July 25, 1947, and published in the October 1947 JOURNAL. Made Standard Sept. 15, 1948. Included under same cover is "Collected Standard Specifications for Service Line Materials," a committee report. 15 pp., 25¢.

C900—Records and General

AWWA C900-40 (formerly 7G.1-1940)—
Recommended Practice for Distribution System Records. Approved Jan. 16, 1940, and published in the February 1940 JOURNAL. Included under same cover are reprints of "Economies in Office Forms" by Israel Raskind and "Coordinating Operating System Records With Accounting Records" by Nathan B. Jacobs. 52 pp., 60¢.

D—Storage

AWWA D100-52 (formerly 7H.1)—
Standard Specifications for Elevated Steel Water Tanks, Standpipes, and Reservoirs. Revision of 1948 document approved May 9, 1952. Combined with AWWA D102, description of which appears below, in a single booklet. 60 pp., 65¢.

AWWA D101-52T (formerly 7H.2)—
Tentative Recommended Practice for Inspecting and Repairing Elevated Steel Water Storage Tanks, Standpipes, and Reservoirs. Revision of 1949 document

approved May 9, 1952. Combined with AWWA D102, description of which appears below, in a single booklet. 32 pp., 35¢.

AWWA D102-52T—**Tentative Recommended Practice for Painting and Re-painting Elevated Steel Water Storage Tanks, Standpipes, and Reservoirs.** Approved by AWWA as Tentative May 9, 1952, and published in the August 1952 JOURNAL. Available only in combination with AWWA D100 or AWWA D101, prices of which are given above.

Binder for AWWA Standards

A handy loose-leaf binder for AWWA standards has been prepared for bookshelf, desk and field use. Sturdily bound in blue canvas with backbone lettering in dark blue, the binder has metal hinges for maximum durability under all conditions. Capacious 1½-in. rings will hold more than a normal complement of specifications. Projecting tabs on eight blank separator cards insure prompt location of the user's choice of specifications groups. All specifications booklets are punched to fit the three rings of the binder. Price, \$2.85, net (U.S. postage prepaid).

ORDER FORM

AWWA Publications

Payment in U.S. funds is required in advance from
nonmembers.

American Water Works Association, Inc.
521 Fifth Avenue
New York 17, N.Y.

The publications ordered on the reverse of this sheet should be sent to:

- I enclose \$ _____ in U.S. funds.
- Charge my A.W.W.A. Membership account \$ _____ and bill me when shipment is made.

If any of the items ordered are out of print, please:

- Cancel that portion of my order and return any surplus funds.
- Place my order on file and fill as soon as possible.

(Money will be refunded on all orders which it may not be possible to fill within a reasonable time—approximately three months.)

(Signature) _____

Quantity Discounts

A discount of 15% applies to purchases of 25 or more copies of any one standard. Orders for 100 or more copies must generally be printed to order, at correspondingly greater discounts—quotations will be supplied on request. Approximately six to eight weeks are required for reprinting.

(over)

Fill in your order in the spaces provided below and on the reverse of this sheet.

we're celebrating our

20th

anniversary!

A lot of water has gone under the bridge, *and* through the millions of feet of "Southern" pipe produced since 1932. Then, too, if we included the oil and gas loads that "Southern" pipe has carried, we could *really* come up with a figure! This wouldn't serve any particular purpose, though, since the main point we want to get across is that, over the past 20 years we have become recognized as *steel pipe specialists*. This recognition has come on the basis of jobs supplied and actual field results obtained...and can be a big help in your own piping plans!

SMITH HYDRANTS WITH "O" RING SEAL

"O" Rings replace conventional packing and reduce maintenance to a minimum. The lower "O" Ring is the pressure seal, the upper "O" Ring the dirt seal. The specially compounded rubber plastic "O" Rings do not deteriorate and insure a long life pressure seal.

All Smith Hydrants including Hydrants in service can be fitted with "O" Ring Seal Plates. Write for details.

THE A.P. SMITH MFG. CO.

EAST ORANGE, NEW JERSEY

At Dallas, Texas...

Softening and Coagulation

calls for conventional treatment

Just like your fingerprints . . . no two water treatment problems are exactly alike. The answer to your specific problem must be determined by an analysis of raw water composition, rate of flow and other variables. In Dallas, these factors add up to conventional treatment with Dorr equipment.

Whether your problem requires high-rate or conventional types of units, call Dorr for equipment recommendations to give you the end result you want. Under all types of conditions, throughout the world, Dorr installations are providing positive sludge removal . . . with minimum water loss.

Interesting information about many types of Dorr water treatment equipment is in Bulletin No. 9141. Ask us to send you a copy. THE DORR COMPANY, Stamford, Conn.

Every day, nearly 8 billion gallons of water are treated by Dorr equipment.

The Elm Fork water treatment plant at Dallas, Texas, treats an average flow of 64 M.G.D., while maximum capacity is 96 M.G.D. This plant uses the following Dorr equipment: 8 Dorco Primary Flash Mixers, 4 Dorco Secondary Flash Mixers, 2 Dorco Primary Floculators*, 2 Dorco Secondary Floculators and 4 Dorco Squarex® Crossflow Clarifiers (each 160' square). *Reg. U. S. Pat. Off.
